Education

Indian Institute of Information Technology **August 2024 – Present**
B.Tech - Artificial Intelligence and Data Engineering - CGPA - 8.80 *Kota, Rajasthan*

Relevant Coursework

- | | | | |
|---------|---------------------|---------------------|-----------------------|
| • DSA | • Operating Systems | • Computer Networks | • Database Management |
| • AI/ML | • Deep Learning | • IPCV | • NLP |

Experience

GFG Campus Body, IIIT Kota **August 2025 – August 2026**
Tech Member – AI/ML Lead *Kota, Rajasthan*

- Organized a technical hackathon and AI/ML workshops for **300+ students**, driving hands-on exposure to emerging technologies.
- Coordinated technical activities for student orientation and campus events, ensuring smooth execution of technical sessions.
- Mentored students in **AI/ML concepts, project development, and technical problem-solving**, supporting hands-on learning.

Projects

[The Dreams - Real Estate Platform](#) 🐙 | MERN, JWT, REST APIs, Tailwind CSS, React Router **2026**

- Built a full-stack **real estate platform** enabling **property discovery, search, buying, renting, and listing** through a responsive and interactive interface.
- Implemented **JWT authentication, protected routes, location-based filtering, and dynamic property listings** for secure and seamless property management.
- Developed **RESTful APIs** using Node.js and Express.js, integrating MongoDB for efficient user and property data management.
- Crafted **reusable, responsive UI components** with React Router, Tailwind CSS, and Framer Motion, delivering smooth navigation and engaging experiences across desktop and mobile devices.

[AI-Powered Chest X-Ray Diagnosis System](#) 🐙 | DenseNet121, TensorFlow, Keras, Python, Flask **2026**

- Engineered a **DenseNet121-based chest X-ray classification system** to detect **COVID-19, Pneumonia, and Normal** cases, with sample predictions reaching approximately **95% confidence**.
- Developed a **Flask-based inference backend** integrating TensorFlow/Keras for automated image preprocessing, model prediction, confidence scoring, and **patient report generation**.
- Built a responsive **AI-powered diagnostic interface** with Tailwind CSS for seamless X-ray upload, prediction visualization, and result presentation.

[AI-Powered Brain Tumor Detection System](#) 🐙 | Python, TensorFlow, Keras, DenseNet121, Flask **2026**

- Developed a **deep learning-based web application** for automated classification of brain MRI scans into **Glioma, Meningioma, Pituitary Tumor, and No Tumor**.
- Implemented **DenseNet121 transfer learning** for multi-class MRI classification and integrated the model with a **Flask REST backend** for image processing and confidence-based predictions.
- Designed a **responsive prediction interface** for MRI upload and result visualization, and deployed the complete application online for real-world demonstration.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Tailwind CSS, Bootstrap, React Router, Redux

Backend: Node.js, Express.js, Flask, REST APIs, JWT

Databases: MongoDB, MySQL, PostgreSQL

AI/ML: TensorFlow, Keras, Scikit-learn, PyTorch, OpenCV, CNN, ResNet50, DenseNet121, LSTM, BiLSTM

Developer Tools: Git, GitHub, VS Code, npm, Postman, Vite, Vercel, Render, Railway, Google Colab

Achievements & Problem Solving

- Solved **670+ LeetCode problems** across Data Structures, Algorithms, and SQL, strengthening problem-solving skills in algorithms, database querying, and optimization.
- Selected for the **Final Presentation Round** of the **IIIT Bangalore Hackathon — Datathon for Data-Driven Policy Innovation 2025**.
- Completed the **Deloitte Data Analytics Job Simulation** on Forage in March 2026.
